

Israel-Palestine Conflict

Committee: **United Nations General Assembly First Committee (the Disarmament and International Security Committee)**

Topic: **Malaysia's position in the Israel-Palestine Conflict**

Country: **Malaysia**

Delegate: **Nehir Samurkaş**

As the council knows problems between Israel and Palestine is very important. Their problems started over a hundred years ago. They have been fighting over their territory for generations. This conflict does not only affect these two countries but it affects the countries nearby and countries that support one of the sides. The present Israel Palestine conflict started in 1967 when the Six-Day War started and it should be solved as soon as possible.

Malaysia is a Muslim country like Palestine so we support our coreligionist partner in this conflict. We protested Israel's movements in many ways in our country. We also rejected Israel's offer to normalize.

Malaysia believes that war is never a solution no matter the topic. In order to solve the problems between Israel and Palestine we and other countries that have a relation to the topic, should all unite and speak, work for peace. As our president, state department, and many politicians stated before Malaysia will play an active role on bringing a fair and permanent solution to the conflict.

Malaysia thinks going back to the borders before 1967 Six-Day War is the most fair and acceptable solution. East Jerusalem being the capital of Palestine will be fair and bring peace. We always supported two-state solution. Jerusalem is important for both Muslims and Jewish people so dividing Jerusalem fairly is the solution we are looking for. We give our full support to Palestine to win its own rights back. Two countries living side by side and in peace is the main goal.
