

Country:Nigeria

Commitee: Disarmament and International Security
Commitee(DISEC)

Agenda Item:Nuclear Non-proliferation and Disarmament

Nigeria has the biggest population in Africa and Nigeria has a powerful history that not be forgotten. Nigeria has a big achivements on exportation . Nigeria on the 11th rank on exportation. About Nigerias economy, Nigeria makes oil production and agriculture.

As everyone knows nuclear non proliferation is an important subject. Nuclear power can be realy dangerous for our country for example a nuclear bomb can destroy the people the country even the world! So we must be careful in this subject. About Nigerias future plans we are planning a system that every country can be join. About the system participant countrys will make a agreement about their plans. On that system every country will try a method that wont be harmful for the world, like build non harmful nuclear factorys. On that system there will be no nuclear wars. This system will care peace and international respect.

About the last part we wish these problems will solve. We hope we will discuss our problems kindly and calmly of course we have more problems that Nigeria didnt mentinioned. Thanks for payed attention to us.
