

Country: Guyana

Committee: UNSC

Agenda Item: Palestine and Israel war

Guyana is a country which is located in South America. A lot of ethnic groups like Indian, African, European lives in here peacefully. Guyana is a parliamentary and representative democratic republic. The president is Irfaan Ali. Official language of the country is English.

Because of the war, civilian people are dying every day. Many people lose their families even though they don't deserve it. Innocent kids are dying every day, every hour they have no chance to make their dreams come true in the future. Some of them have to keep on their lives without their parents. They're innocent and they need to be saved by us.

In order to save those civilian people, Israel and Palestine have to compromise.

Palestine can be an independent staten in West Sharia, Gaza and East Jerusalem. Israel and Palestine will have a completely two different governments but this governments should settle on safety of the folk. So that we can pacify the Israeli and Palestinian people.
