

## **POSITION PAPER**

**Committee:** UNICEF

**Delegate:** Ali Enes ÖZTÜRK

**Country:** Ukraine

**Topic:** Protecting Children from Bullying and Violence

Ukraine is happy to be on this committee and wants a solution to the issue of bullying. It is open to all kinds of ideas to solve bullying.

Bullying is the bad and hurtful behavior of a group or person to another person or group. Bullying is a huge problem around the world, especially in children.

Bullying is a condition that occurs in one out of every three children in the world. Of course, this is a very bad event. But Ukraine believes that this problem will be solved. Although bullying is the same rate in boys and girls, physical bullying is usually seen in boys and emotional bullying in girls. In Ukraine, 30% of children between the ages of 10-17 are bullied.

In order to prevent bullying, we first need to understand that the child is being bullied, and for this, good communication between the child and the parent must be maintained. Thus, it is easier to understand that the child is bullied. When children are bullied, it is recommended to be directed to their favorite hobbies. Providing bullying-related training will also reduce bullying. In addition, psychological support should be given to bullying and bullying children.

Ukraine has been at war with Russia for a long time, and this affects the mental health of children in Ukraine a lot. That's why bullying is much more common in Ukraine. Ukraine is doing its best on this issue despite the war with Russia.

Thank you for your attention.
