

Committee:United Nations Educational, Scientific and Cultural Organization(UNESCO)

Agenda Item:Promoting Sustainable Education for Climate Action, Strengthening the Protection and Promotion of Intangible Cultural Heritage

Country:Russian Federation

Delegate:Furkan GÖKKAYA

Russian Federation is located in the northernmost part of Asia. Russian Federation's population is about a hundred and forty-four million. For the Agenda Item of Promoting Sustainable Education for Climate Action, as Russian Federation we think education can help humanity more than expected, because if we educate our new generations they can be more related and careful about climate actions. We can educate them by adding new compulsory subjects for each school level and each student so the new generation can learn from school what can they do for their planet and their future.

We should mention the ESD project of UNESCO. ESD is a response to the climate problems of our planet. UNESCO's ESD for 2030 programme produces and shares information. Suggests policy guidance and technical support to countries and shows activity in the field. Encourages to peer learning by information, networks and partnerships.

According to UNESCO's Global Monitoring Report on ESD about 80% countries uses ESD or climate problems education in their education policies but however more than 50% did not added sustainability in their curricula. We can raise this percentage by educate our teachers first because so many teachers thinks this title is not for school but just the opposite this problems must be taught in school life and it must be in school curricula.

As Russian Federation to be honest Russian Federation not cares much about climate actions and the peoples of Russian Federation not educated for this problem and ESD project can be so helpful especially for Russian Federation. Russian Federation has had an incredible impact on weather and environment during war with Ukraine, and the Russian people do not seem to care much about and that is the because of the lack of information, and with ESD and projects like this we can change people's minds.

We can use NGOs for increase this wanted educations because NGOs are more closer to citizens than government and can help peoples easier.They can provide a budget for this project and help UNESCO.

In present world everyone using internet or social medias and spent hours in this technologies. Even though this is harmful to humans, we can use it as an advantage.We can educate them from their technological devices, billboards, documentaries and it would be so helpful for educating every person in state.

For the Agenda Item of Strengthening the Protection and Promotion of Intangible Cultural Heritage we can count religions, languages, traditions, practices, representations, expressions, knowledges, objects for ICH. If we ask how we can protect this kind cultural heritages we can revive them to our peoples with the supports of owner country. We must not lose this heritages because they are our historical personality and living version of our ancestors.

For protection of ICH, UNESCO made a convention and agreed on solutions for protecting ICH and encouraged to all countries to apply this decisions and help for protect and promote ICHs and for applying this solutions created a committee and this committee helps to collabrate UNESCO with states parties. Also this committe is providing guidance on best practices and make recommendations on measures for the safeguarding of the ICH.

In this convention UNESCO decided to what cultural heritages we going to protect under this committe, UNESCO decided we must protect oral traditions and expressions, including language as a vehicle of the ICH, performing arts, social practices, rituals and festive events, knowledge and practices concerning nature and the universe and finally traditional craftsmanship.

In some parts of the world people's rights to practice their traditions is being taken away from them through force and torture. Living traditions is one of the fundamental rights of people and if we can not protect this right some tradtions can be extinct.

As Russian Federation we think by UNESCO we can solve world's cultural heritages problems with collabration with other delegates and make everyone can live their own traditions and lifes.
