

Conference: Model United Nations TOBB ETÜ
Training Conference 2025

Committee: The Economic and Social Council
(ECOSOC)

Country: Kingdom of Sweden

Agenda Item(s):

1. Promoting Gender Equality and Empowering Women in Developing Economies.

The gender equality is one of the most important mission of the entire world. For support the empowering of women; first of all, we must educate both of men and women because we want a definitive solution. It is a well-established fact that the one of the sources of our problem is uneducated people and their beliefs to superstitions. However, we can't say that is the ultimate solution. While we detect the labour market and political empowering graphics of Solomon Island, we can see the contradiction of these two graphics. Solomon Islands is an island nation at Asia-Pacific and they have an unexpected and dishonest graphic of employed women, they are the first country with most employed women for percent (%82) however %74 of employed women are vulnerable employed women and Women don't have effective political rights and land ownerships, Asia-Pacific countries have common problems. We must solve this because Asia-Pacific region has a significant economic role at the world, because of this we must employ women at this region and we can maximize the efficiency of the economy.

The situation is getting worse at nearly the whole of Africa, Indian subcontinent and some countries in Middle East, that problems have another phase at here, economic reasons and cultural-Superstitional beliefs. African-Indian subcontinent countries have some serious and major problems at economy; wars, governmental issues, famine, problems in healthcare system and insufficient education are causing this situation.

Middle East Region has more problems with wars and terrorism in their countries, especially civil wars and beliefs that people blindly follow.

As Sweden Kingdom; we supported, we will support and we are supporting every acts of UN.

As Sweden, we thought that we can create new economical partnerships with these regional countries. We know that some of these countries haven't good relationships like India-Pakistan but these situations shouldn't stop us. If we want to support women, we must firstly start to guarantee more rights to women in constitutions. Then we can unite regional countries at a conference for an economic cooperation, this cooperation will be

specialized for women empowering and employing. Later, we must start to donate schools and educate people with true and trustable education. This is the only way for sustainable reformations.
