Committee: Disarmament and International Security

Topic: Addressing Threats to Merchant Shipping: The Rise of Weaponised Drones and Terrorism at Sea

Country: United Arab Emirates

UAE believes that the security of ships and trade routes is very important for countrys and for the world. Nowadays weaponised drones and terrorism at sea are growing dangers those can harm global safety sailors UAE thinks this committee must work together to stop these attacks and terrorism. UAE is located in very important place where many important ships passes every day

Because of this UAE experienced some security risks and such as drone attacks The UAE has worked with United Nations and other countries to improve the safety of civillians and some ships and also UAE strongly rejects any attack on civillian ships

The UAE has always taken maritime safety seriously. The UAE has joined important international agreements such as UNCLOS and the SUA Convention which aim to improve the safety of maritime navigation and prevent terrorist attacks at sea And country also invested in modern systems such as coastal radars satellite monitoring and smart port technology The UAE strongly believes that any attack on civilian ships is unacceptable and must be stopped through cooperation and strong international laws

And the UAE believes that the rise of weaponised drones is the most dangerous thrats to civilian security cause drones can attack from far away they are cheap and can be controlled by terrorist

For solution BAE recommend that we can better global drone detection systems and countrys can improvce theri port security cause ports should use stronger scanning systems and we can support some seaside states for terrorism at the sea we can teach and give lessons to peoples
