

Country: United States of America

Committee: FAO (Food and Agriculture Organization)

Agenda Item: Sustainable Food and Agriculture in the World

Paragraph 1 (Country Background)

The United States of America is located in North America and always supports goal of Food and Agriculture Organization. United States of America is the one of the members of FAO and work on hunger and how to improve farming in the World. United States of America has been working on some issues like food shortage, climate, farming technology. The government supports food security, sustainable farming and using latest technology in agriculture. We believe that if we work together with all of the countries we will solve sustainable food threatment and negative effects of climate change on agriculture.

Paragraph 2 – Historical Background & International Actions

United States of America has struggled with hunger in the World. But food security has been a very big problem for many years. The United States of America also helped UN resolutions on Agriculture and sustainable food with creating programmes like Feed the Future worked with Africa, Latin America and Asia. Another Project on food security is USAID (U.S Agency for International Development) which focus on improving food security and identifying climate change effects on agriculture.

Paragraph 3 – National Policy & Proposed Solutions

United States of America highly supports global actions on sustainable farming and agricultural development with international cooperation. Using science especially AI technology and new farming technology will help on improving food security and eliminating food shortage. The country encourage investments on farming and small farmers. The country invites other countries for better cooperation on global food access. The United States of America asks the FAO to improve early warning systems, respond quickly to emergencies caused by climate change. The country invites the committee to focus on long term solutions, working with other countries, fair trade. We also make sure that everyone can access safe, healthy and affordable food.
