

Country: Nigeria

Committee: World Food Programme (WFP)

Agenda Item: Safe Food

Paragraph 1:

Nigeria is a country in Africa. Many people live there. Food is very important for everyone. In some places, food is not safe to eat. Dirty water and bad storage can make food unsafe. This can cause people, especially children, to get sick. Safe food is an important issue in Nigeria.

Paragraph 2:

Safe food is a problem because of poverty and lack of clean water. Some farmers and sellers do not have good tools to keep food clean. The United Nations works to improve food safety. The World Food Programme helps by giving safe and clean food to people in need. WFP also teaches people how to keep food safe.

Paragraph 3:

Nigeria supports working with the WFP on safe food. The country wants more clean water and better food storage. Teaching people about safe food is important. Children need safe food to grow healthy. With support from WFP, food safety in Nigeria can improve.
