

Country: Kingdom of Spain

Committee: Intergovernmental Panel on Climate Change (IPCC)

Agenda Item: Climate Change And Its Impact on Humans

School: Bahçelievler Deneme Anatolian High School

The Kingdom of Spain is a country located in southwestern Europe, also possessing some territories in North Africa. The capital of Spain Kingdom is Madrid. Surface area is 505.992 km². The population of the Kingdom of Spain is 49,077,984. It is the largest country by area in Southern Europe and the fourth most populous in the European Union. The Kingdom of Spain is governed by a constitutional monarchy organized as a parliamentary democracy. The head of state is King Philip VI.

The kingdom of Spain is vulnerable to the impacts of global warming. Rising temperatures, water scarcity, desertification, forest fires, and heat waves pose serious risks to public health, agriculture, tourism, and economic stability.

The kingdom of Spain is vulnerable to the impacts of global warming. Rising temperatures, water scarcity, desertification, forest fires, and heat waves pose serious risks to public health, agriculture, tourism, and economic stability.

The Kingdom of Spain's solutions to this problem are as follows:

- Increased use of renewable energy sources
- Establishment of early warning systems against heat waves
- Raising public awareness
