

## Position Paper

Country: Bolivia

Committee: United Nations International Children's Emergency Fund

Topic: 1) Fighting against social exclusion and child poverty

2) Providing education during emergencies

Bolivia is a South-American country. Bolivia is considered a poor country with the lowest GDP per capita among the Latin countries of South America.

Unemployment is the very first reason behind child poverty. All countries must work on decreasing the unemployment rate and increasing income for families. Creating new job opportunities can be the best solution. So, we invite all member countries to visit Bolivia and invest in Bolivia.

Bolivia experiences emergencies frequently. These emergencies affect the schools and education. We need to support educational facilities when we experience emergencies. Online education is a good alternative.

Bolivia suggests member countries to work together and help each other. Non-developed countries are expecting our help.
