

Delegate: Ecrin Uzun

Committee: Commission on Narcotic Drugs (CND)

Agenda Items: Strengthening International Cooperation to Combat Drug Trafficking and Narco

Honorable chairs and esteemed delegates. Drug and narcotic abuse have long been a distressing issue around the world. Although most countries are working to solve this problem, we as the delegation of Thailand don't think that the solutions are enough.

First of all, all problems solution is through education. We as the government should educate our people through giving lessons in schools and ads in social medias as well as posters. Also, the protection and security of school areas, alleyways and parks which are common places to trade and buy drugs. Drug dealers often use orphan children from orphanages. So, we should run a through background check on adoptive parents and orphanages. Thailand has come up with laws and solutions as well.

The consumption, distribution and possession of narcotics and any additive medicines are controlled and monitored by the Thailand Office of Narcotic Boards together with other relevant authorities, such as the police. In Thailand, the punishment for drug use can be a large fine or even imprisonment. According to the latest Thai laws, the state also provides support for the rehabilitation of these people. In addition, cannabis distribution places that the state allows for sale are frequently monitored and managed. In addition, penalties for causing public nuisance from the recreational use of cannabis still apply. Offenders may have to serve jail terms or responsible for a fine. Although the state tries to prevent it, unfortunately there are a certain number of drug addicts and dealers. We have been able to alleviate our usage of drugs to a point, yet we still suffer because of the over usage of narcotics. We hope for the guidance of more experienced countries and call upon the more developed. countries for financial contribution. We hope this conference will produce impactful solutions and wish to benefit from them. Thank you.
