

Delegation from:Morocco

Committee:The Commission on the Status of Women(CSW)

Topic:Recognition and Visibility of Transgender Women

Transgender,inconsistency of a person's gender identity with their assigned gender.The term transgender is used to describe people with this condition and is a phenomenon completely independent of sexual orientation.Between January 2008 and September 2020,3664 trans murders were recorded worldwide.The number of murders recorded in the last year alone is 350.The Trans Respect study states that there has been a gradual increase in trans murders in the last 10 years.

Morocco is a Islam country.Islam says that;Islam,assertively,affirmed that humankind was created into two kinds that each one,biologically,only relates to one gender identity,male or female.Cultural norms and traditional readings of sacred texts uphold a heteronormative binary of gender identification.The Islamic view of the transgender can be found in the sacred text of Islam,but not specifiially described.So that it is illegal to be transgender person or LGBTQ individual in Islam countries like Morocco.As a result of not following the rules,people can be imprisoned from 6 months to 3 years.This is a general and unalterable feature of Islamic culture that we have to obey this rule.A tolerant policy towards trans rights is not shown,and people who break our word are subject to be in prison or they have to pay fees.And the other people,who knows the property of Islam countries and Morocco,will express their hatred to transgender people.People in Morocco,especially women,immigrate for their own independence.

As a result of being transgender person or transgender women in Morocco is strictly forbidden.If they want to take this risk,they will deal with the punishment.

Also like every country,Morocco will want to give freedom to people.But it is seems like impossible.Only if the Islamic culture changes and a more tolerant humanitarian policy comes,this situation can change,transgender women and the other trans people can be granted rights and freedoms.
