

# Child Labor

Committee : **UNICEF**

Topic : **Saudi Arabia's Position On Child Labor**

Country : **Saudi Arabia**

Delegate : **Nehir Samurkaş**

As the council knows, child labor is a great issue that all countries suffer from. Child labor has multiple reasons and multidimensional consequences. Preventing and eradicating child labor is needed and complicated.

Saudi Arabia made conventions to solve child labor problem. We are aware that in our country child labor is at a high rate and we are doing best we can to reduce it. We are definitely one of the countries that take action and we will continue to do so.

Saudi Arabia thinks for solving child labor, education and proper income for families is a must. In order to provide these quicker we think there should be detailed surveys and studies done especially on families with microenterprises and families with very low incomes.

We should not only focus to prevention and also look for ways to reintegrate child labor survivors. We think providing psychological help and healthcare to the ones who survived child labor would make things easier and better. These chances can be produced from some foundations like UNICEF and many more.

Saudi Arabia believes even though the problem is big and deep seated we can unite and solve it together.
