

Committee: ECOSOC (Economic and Social Council)

Topic:: Integration Of International Monetary Parity Into Cryptocurrency

Country: Turkey (TC)

Delegate: MERT PAYZA

## ABOUT TURKEY

Turkey, or officially the Republic of Turkey, is a country with most of its territory in Anatolia and a small part in Thrace, the southeastern extension of the Balkan Peninsula. It borders Bulgaria in the northwest, Georgia in the west and east, Armenia, Iran and Azerbaijan in the east, Nakhchivan, and Iraq and Syria in the southeast. It is surrounded by the island of Cyprus and the Mediterranean in the south, the Aegean Sea in the west and the Black Sea in the north. The Sea of Marmara, along with the Bosphorus and the Dardanelles, separates Anatolia from Thrace, that is, Asia from Europe. Turkey, the European and Asian continents entering the crossroads have an important geostrategic power.

To exchange information on the last topic is Bitcoin somewhere in particular. II. The system of World War II politics will be put to the test, the next generation currency, Bitcoin. The possible compatibility and inconsistency of virtual money with the existing system in Bitcoin are handled in different ways. Money transfers for the use of the Bitcoin virtual currency are made through means and. This road has no cost and no real price. This is the most fragile title of state powers. However, the ongoing exponential and fluctuating appreciation of Bitcoin causes it to continue the dairy debate. Particularly in the structure of Bitcoin movement, the finance section of virtual currencies will be a topic worth discussing here. In particular, Islamic Finance is considered as a new perspective as a project for its development potential. The need to bring together these comparison values and the information infrastructure is benefited from the daylight. This study consists of certain aspects of Bitcoin's international financial systems. It is progressing in such a way that it is not possible for those who bring a completely new system under the name of Blockchain to facilitate their existing financing systems and their own purchasing practices.
